INDEX TO VOLUME 87

Compiled by Willetta Lueshen

This index is primarily one of new information. Previously published information referred to in this volume has not been indexed unless extensive comparisons or reinterpretations are involved. For some species, especially ones not in the A. O. U. Checklist area, scientific names only have been entered, and in some instances entries under scientific names are more extensive than those under vernacular names. New generic, specific, and subspecific names are printed in **boldface** type.

Aberration, color (see also Abnormality), Perdix perdix, 375–376
Abnormality (see also Aberration), Bonasa umbellus, 172–173
  Sturnella n. neglecta, 173–174
Accipiter
  cooperii, 275
  striatus, 275, 452–457
Actitis macularia, 134–135, 160
Aechmophorus
  major, 568–572
  occidentalis, 129, 568–572
Aechmorhynchus cancellatus, 760–780
Aegolius acadicus, 738–741
Africa, 577
Agelaius phoeniceus, 584, 692–713

Date of Issue (Vol. 87, No. 4): October 5, 1970

Of special interest to ornithologists for its insight into the nesting behavior of a raptor.

An Eagle to the Sky

by Frances Hamerstrom, Wildlife Biologist, Wisconsin Department of Natural Resources, and (with Frederick Hamerstrom) twice winner of the Wildlife Society Award.

A keen observer has written a factual and entertaining account of sharing an eagle's nest—how the nest is built and what stimulates an eagle to feed a younger chick first. A nesting eagle, feeding the author's fingers as though they were an eaglet, taught her the different stimuli that cause either partial swallowing and regurgitation of small bits of food, or the direct feeding of large chunks.

Hunting techniques are described in her adventures in training and conditioning an injured eagle so it could fend for itself in the wild. Here, too, is a warm and fascinating account of a very special kind of communication between scientist and wild bird that has no connotation of a mistress-pet relationship.

Beautiful pen and ink sketches by Deann De La Ronde illustrate the Wisconsin woodlands where the eagles have flown free on the wind, and the campsites and hunts shared by a woman with rare empathy and her wild charges.

Called by Oliver Austin, Jr., "*the best sort of nature writing,*" AN EAGLE TO THE SKY is available at $4.95 from bookstores.
